INSOLE CONSTRUCTION FOR FOOTWEAR

CROSS REFERENCE TO RELATED APPLICATION

This application is a continuation of Application Serial No.

5 09/360,155 filed on July 26, 1999 now Patent No. 6, 675,501

BACKGROUND OF THE INVENTION

The present invention relates generally to an insole construction for footwear and, more particularly, to such an insole construction which provides increased comfort and support for the foot of the wearer.

Recent efforts to provide footwear which is both comfortable and anatomically beneficial to the wearer have resulted in many concepts having varying degrees of effectiveness. Most of these concepts are merely variations of other concepts which have been around for years. Historically, there have been a number of attempts to increase the cushioning and support of footwear by making modifications to the insole or midsole. These attempts have been subject to one or more of the following disadvantages:
